Planning and supporting in the Primary Classroom, with developing the Computer Science Curriculum

BPSI is able to offer support in planning and team teaching with individual teachers, helping them to gain the confidence to teach in this new area of the curriculum.

The Coding Curriculum especially can be overwhelming for some teachers and they may require one to one support. Each teacher will be supported in planning, team teaching together and developing their own skills to deliver the coding curriculum. The support will also provide an opportunity for the teacher to reflect on the lessons and assess the abilities of the children, allowing planning for the next stages and extension lessons.

At a BPSI School, a detailed timetable of support over a term proved to be a valuable input. The Head commented -

“Every project has been anticipated with enthusiasm then followed up, extended and thoroughly enjoyed by the pupils and the teachers alike. Teachers have already amended their long term plans for 2016-17 in the light of this training.” **July 2016**
